Instructor: Antoni Brzoska
Email: antoni.brzoska@uconn.edu
Office Hours: TTh 1 PM - 2 PM and F 11 AM - 12:20 PM in MSB 419
Course Website: www.math.uconn.edu/~brzoska/math2110f15/index.html
Textbook: Multivariable Calculus, by James Stewart

Approximate Course Outline:

- Chapter 12 .............................................. about 2 weeks
- Chapter 13 .............................................. about 1 week
- Chapter 14 .............................................. about 3 weeks
- Midterm 1 .............................................. in class, TBD
- Chapter 15 .............................................. about 4 weeks
- Midterm 2 .............................................. in class, TBD
- Chapter 16 .............................................. about 4 weeks
- Final Exam .............................................. during finals week (TBD)

Grading:

- Homework .............................................. 20%
- Midterm 1 .............................................. 25%
- Midterm 2 .............................................. 25%
- Final Exam .............................................. 30%

Grading Policy: Your performance will be judged both objectively and in comparison to your peers.

Homework: Homework assignments will be posted on WebAssign. If a given section is covered in one week, the corresponding homework assignment will be due the following Thursday at 11:59 PM. If you fail to complete the homework by a given due date, then you may be granted an extension. You must let me know in class or via email in a timely manner (within a day of the due date) and provide a valid excuse. A maximum of two such extensions will be granted. No exceptions.

Exams: There will be two in-class midterms and a final. The two midterms will not be cumulative. The final will be weighted more heavily on the material not tested on the two midterms. Make-up exams must be arranged in advance, no later than one week before the exam date. During exams, you will be allowed to have one side of one sheet of an 8.5” x 11” piece of paper with notes. No calculators are allowed.

Succeeding in Class: Spend time and work hard outside of class reviewing the material. Students spend 240 minutes per week in class, and should expect to spend another 480-720 minutes per week outside of class on this course alone.

Academic Integrity: Breaches of academic honesty and cases of academic misconduct will not be tolerated and will be treated following university rules and regulations.
