

Curriculum Vitae

Manuel Lerman

Professor Emeritus
Department of Mathematics
University of Connecticut
Storrs, Connecticut 06269-3009
telephone: (860)486-3928
e-mail: mlerman@math.uconn.edu
fax: (860)486-4328

Date of Appointment 1973

Birthdate: February 5, 1943
Birthplace: New York, New York

Education: B.S. 1964 City College of New York
Ph.D. 1968 Cornell University

Experience: 1968-70 Instructor, Massachusetts Institute of Technology
1970-73 Assistant Professor, Yale University
1973-76 Associate Professor, University of Connecticut
1976-2006 Professor, University of Connecticut
1975-76 Visiting Professor, University of Illinois at Chicago
2/81, 3/95 Visiting Professor, University of Chicago
1990 Fellow, Mathematical Sciences Research Institute, Berkeley
2006- Professor Emeritus, University of Connecticut

Professional Societies: American Mathematical Society
Association for Symbolic Logic
American Association of University Professors

Honors or Distinctions: Phi Beta Kappa
National Science Foundation Research Grants, 1970-95, 1995-98.
NSF Conference Grant, 1979.
AAUP Research Excellence Award, 1999.
Editor: Logic Year 1979-80: The University of Connecticut.
Editor: Computability Theory and Its Applications. Contemporary Math.
Managing Editor, Perspectives in Mathematical Logic Series,
Springer-Verlag, 1986-1998, Editor 1999-2000.
Editor: Bulletin for Symbolic Logic, 2001-2006.
Editor: Lecture Notes in Logic, 2010-
Invited Plenary Address, International Congress for Logic, Methodology
and the Philosophy of Science, Uppsala, Sweden, 1991.
Invited Plenary Addresses, Annual Meeting of the Association for
Symbolic Logic, 1979, 1989, 1997.
NSF Equipment Grant, 1986-88.
NSF Logic Seminar Grant, 1986-05.
U.S. - New Zealand Binational Research Grant, 1988-90,
Principal Investigator.
U.S. - Germany Binational Research Grant, 1991-97.
Program Chair, Annual Meeting of the Association
for Symbolic Logic, 1994.
Association for Symbolic Logic: Council Member, 1986-98,
Prize Committee Chair, 1996-2000.

Field of Specialization: Mathematical Logic
Research Interests: Computability Theory, Computable Model Theory

Ph.D. Students: Chi Tat Chong, National University of Singapore
Anne Leggett, Loyola University of Chicago
James Hefferon, St. Michael's College
Hong Ye, Microsoft
Zhiming Zou, Industry
Frank Weber, Industry
Burkhard Englert, UCLA

Publications

Books and Monographs

1. Lerman, M. 1983. Degrees of Unsolvability: Local and Global Theory, Perspectives in Mathematical Logic, Springer-Verlag Publishing Co., Berlin, Heidelberg, New York, 307 pps.
2. Lerman, M. Priority Arguments Using Iterated Trees of Strategies, to appear, Lecture Notes in Logic.

Journal Articles

Invited Addresses

1. The lattice of recursively enumerable sets, University of Connecticut Mathematics Colloquium, 1971.
2. Minimal pairs of α -recursively enumerable α -degrees, Cambridge Summer School in Logic, 1971.
3. The α -finite injury priority method, Amer. Math. Soc. Special Session on Recursion Theory, Milwaukee, 1971.
4. Maximal α -r.e. sets for uncountable admissible ordinals, M.I.T. Logic Seminar, 1972.
5. Maximal α -r.e. sets for uncountable admissible ordinals, Cornell Mathematics Colloquium, 1972.
6. Maximal sets and admissible ordinals, Amer. Math. Soc. Special Session on Recursion Theory, Dartmouth, 1972.
7. Algebraic structures in recursion theory, Mathematics Colloquium, University of Illinois at Chicago, 1975.
8. Congruence relations and definability in lattices of α -recursively enumerable sets, Amer. Math. Soc. Special Session on Recursion Theory, St. Louis, 1975.

9. On elementary theories of some lattices of α -r.e. sets, Amer. Math. Soc. Special Session on Recursion Theory, Toronto, 1976.
10. Recursive Model Theory, New aspects in Mathematical Logic, Oberwolfach, Germany, 1976.
11. Recursive Model Theory, Mathematics Colloquium, Pennsylvania State University, 1977.
12. Lattices of α -r.e. sets, Second International Conference on Generalized Recursion Theory, University of Oslo, Norway, 1977.
13. Degrees of unsolvability, Recent Aspects of Mathematical Logic, Yale University, 1977.
14. A survey of results in classical recursion theory, M.I.T. Logic Colloquium, 1977.
15. Initial segments of the degrees less than $\mathbf{0}'$, Amer. Math. Soc. Special Session on Applications of Logic to Mathematics, Providence, 1978.
16. Recursively enumerable degrees, M.I.T. Logic Colloquium, 1978.
17. Recent results on the degrees of unsolvability, Logic Colloquium '79, Leeds, England, 1979.
18. Recent results on the degrees of unsolvability, Invited Address, Annual Meeting of the Association for Symbolic Logic, New York, 1979.
19. Recent directions in recursion theory, Mathematics Colloquium, University of Miami, 1980.
20. Degrees of Unsolvability, Omega Group Meeting, Patras, Greece, 1980.
21. Recursive Linear Orderings, Amer. Math. Soc. Special Session on Recursion Theory, Kenosha, Wisc., 1980.
22. Recursive Linear Orderings, UCLA Logic Colloquium, 1981.
23. Recursive Linear Orderings, (Series of 2 talks), University of Chicago, 1981.
24. Initial segments of the degrees below $\mathbf{0}'$, (series of 2 talks), University of Chicago, 1981.
25. Splitting Theorems, Cornell logic Seminar, 1981.
26. Recursive Linear Orderings, Logic Seminar, Hebrew University, Jerusalem, 1981.
27. Recursion Theoretic Structures, First Southeast Asian Conference on Mathematical Logic, 1981.
28. Recursive Linear Orderings, Western Illinois University Mathematics Colloquium, Macomb, 1981.
29. The embedding problem for the recursively enumerable degrees, Cornell Summer Institute, 1982.
30. A jump away from $\mathbf{0}^{(\omega)}$, M.I.T. Harvard Logic Colloquium, 1982.
31. The degrees below $\mathbf{0}^{(\omega)}$, Second Biennial Logic Meeting, M.I.T., 1983.
32. High/Low Hierarchies, Mid-Atlantic Mathematical Logic Seminar, 1985.
33. Invariant classes for high/low hierarchies, University of Illinois Logic Seminar, 1985.
34. High/low hierarchies, Cornell University Logic Seminar, 1985.
35. Generalizations of the Recursion Theorem and Completeness Criteria, UCLA Logic Meeting, 1986.
36. Generalizations of the Recursion Theorem and Completeness Criteria, CUNY Logic Seminar, 1986.
37. $\mathbf{0}'''$ -priority arguments, M.I.T.-Harvard Logic Colloquium, 1986.
38. A game-theoretic approach to recursion theory, (10 lectures), Guizhou University, Guizhou, China, 1987.
39. Recent developments in recursion theory, Mathematics Colloquium, Beijing University, 1987.
40. Decidability, definability, and degree structures, Charles University Mathematics Colloquium, Prague, 1987.
41. Lattice embeddings into the recursively enumerable degrees, Logic Seminar, University of Wisconsin, 1988.
42. Higher-order priority arguments, M.I.T.-Harvard Logic Colloquium, 1988.
43. Minimal degrees and recursively inseparable pairs of recursively enumerable sets, AMS Special Session, Chicago, 1989.
44. Higher-order priority arguments, Invited address, Association for Symbolic Logic Annual Meeting, 1989.
45. Higher-order priority arguments, Logic Seminar, University of Heidelberg, 1989.
46. Embeddings into the recursively enumerable degrees (2 lectures), Recursion Theory Seminar, MSRI, 1990.
47. Recent results on the degrees of unsolvability, Mathematics Colloquium, Univ. of California at Santa Barbara, 1990.
48. The elementary theory of the recursively enumerable degrees with jump predicate, Recursion Theory Seminar, MSRI, 1990.
49. Embeddings into the recursively enumerable degrees preserving least and/or greatest element, M.I.T.-Harvard Logic Colloquium, 1991.

50. Lattice embeddings into the recursively enumerable degrees preserving least and/or greatest element, Invited Plenary Address, International Congress for Logic, Methodology and the Philosophy of Science, Uppsala, Sweden, 1991.
51. Priority arguments using iterated trees of strategies, University of Wisconsin Logic Seminar, 1992.
52. Iterated trees of strategies and constructions of minimal pairs of r.e. degrees, Symposium in honor of Anil Nerode's 60th birthday, Cornell University, 1992.
53. Priority arguments using iterated trees of strategies, Amer. Math. Soc. Special Session, Washington, D.C., 1993.
54. Priority arguments using iterated trees of strategies, Sacks Symposium, Massachusetts Institute of Technology, 1993.
55. An algebraic measure of the computational power of sets, Mathematics Colloquium, Villanova University, 1994.
56. The jump operator and the recursively enumerable degrees, Mid-Atlantic Mathematical Logic Seminar, University of Pennsylvania, 1994.
57. What is a priority argument?, M.I.T.-Harvard Logic Seminar, 1994.
58. A general framework for priority arguments, Conference on Recursion Theory, University of Leeds, England, 1994.
59. Using the framework for priority arguments, Logic Seminar, University of Leeds, Leeds, England, 1994.
60. Towards a decision procedure for the $\forall\exists$ -theory of the r.e. degrees, Logic Seminar, University of Wisconsin, 1995.
61. An algebraic measure of undecidability, and algorithms, Mathematics Colloquium, University of Notre Dame, 1995.
62. Towards a decision procedure for the $\forall\exists$ -theory of the r.e. degrees, Logic Colloquium, University of Chicago, 1995.
63. A general framework for priority arguments, Logic Colloquium, University of Chicago, 1995.
64. Towards a decision procedure for the $\forall\exists$ -theory of the r.e. degrees, M.I.T.-Harvard Logic Colloquium, 1995.
65. Towards a decision procedure for the $\forall\exists$ -theory of the r.e. degrees, Workshop Leader, Greater Boston Biennial Logic Conference, 1995.
66. A finite lattice without critical triple which cannot be embedded into the enumerable degrees, Logic Colloquium '96, Haifa, Israel, 1996.
67. A necessary and sufficient for embedding ranked finite lattices into the computably enumerable degrees, Computability Theory Week, Oberwolfach, Germany, 1996.
68. A necessary and sufficient for embedding ranked finite lattices into the computably enumerable degrees, Cornell University Logic Seminar, 1996.
69. A necessary and sufficient for embedding ranked finite lattices into the computably enumerable degrees, Plenary address, Annual Meeting, Association for Symbolic Logic, Cambridge, MA, 1997.
70. Lattice embeddings into the computably enumerable degrees, Special Session, Summer Meeting of the Association for Symbolic Logic, Leeds, England, 1997.
71. Priority arguments using iterated trees of strategies, Computability Theory Workshop, Kazan, Russia, 1997.
72. Embedding principally decomposable finite lattices into the computably enumerable degrees, Amer. Math. Soc. Special Session, Annual Meeting, Baltimore, MD, 1998.
